PHILIPS OLA

Frontend Developer | React.js | TypeScript | Tailwind CSS

Phone: +2348136626864 | Email: philipsola64@gmail.com | Portfolio | GitHub| LinkedIn | YouTube | Nigeria

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of building experience specializing in React.js, TypeScript, and Tailwind CSS to construct scalable, responsive, and production-ready web applications. Proficient in REST API integration, client-side caching, reusable component architecture, and deployment optimization on Vercel and Render. Proven track record of deploying high-performance applications, including a full-stack architectural idea-sharing network and a data-driven cryptocurrency dashboard. Skilled at transforming raw data streams into polished UI components while maintaining strict optimization patterns like input debouncing and cursor pagination. Former educator and technical mentor at Edo State Polytechnic, Usen, Nigeria, experienced in guiding developers through modern frontend architecture and clean code practices.

EXPERIENCE

Lecturer & Engineering Mentor | *Edo State Polytechnic* — Usen, Nigeria
June 2019 – January 2025

- **Conducted frontend engineering lectures** covering semantic HTML5, advanced CSS3 layout structures, JavaScript, and introductory programming fundamentals within the Computer Science department.
- **Mentored 50+ aspiring developers** in modern frontend architecture patterns, state management strategies (Context API), and production application deployment workflows.

Freelance Frontend Developer | *Self-Employed* — Remote
January 2021 – Present

- **Built and deployed 5+ production-ready web applications** using modern frontend ecosystems, securely hosting live products on Vercel and Render.
- **Integrated complex REST APIs** and optimized end-to-end client-side data flows, prioritizing clean code structures and mobile-first layout designs.
- **Engineered highly responsive web interfaces** for global clients, executing structural performance audits to optimize rendering speeds and core user experience metrics.

PROJECTS

Spark Box - High-Performance Idea Sharing Platform | *React 19, TypeScript, TanStack Router/Query, Tailwind, Express.js, MongoDB*
Live: spark-boxs.vercel.app | GitHub: github.com

- **Built high-performance, responsive idea-publishing platform** deployed on Vercel with an Express/MongoDB backend hosted on Render.
- **Optimized full-stack architecture** by implementing cursor pagination (vs offset) for O(1) fast infinite scroll, TanStack Query caching/invalidation, and optimistic upvotes.
- **Integrated complex REST APIs** using Axios interceptors, JWT httpOnly + refresh token rotation, and protected author verification controls.
- **Resolved critical production issues** including Vercel SPA 404 routing errors via vercel.json rewrites, and mitigated Render cold starts using a custom health cron ping script.
- **Designed reusable component library** (IdeaCard, Header, Footer, Forms) with Tailwind CSS to deliver an optimal mobile-first user experience.

Repo Radar - GitHub Repository Discovery | *React, TypeScript, GitHub API*
Live: repo-radar-ola.vercel.app | GitHub: github.com

- **Engineered a responsive GitHub repository intelligence dashboard** using React and TypeScript to transform raw API metadata into visual, decision-friendly project analytics.
- **Optimized network overhead** and reduced redundant API requests by implementing custom search form debouncing logic to ensure clean rendering during rapid inputs.
- **Architected full integration with the GitHub REST API**, executing strategic rate-limit management, token authentication, and client-side caching for seamless discovery.

CoinTrackal - Crypto Dashboard | *React 19, Chart.js, CoinGecko REST API*
Live: cointrackal.vercel.app | GitHub: github.com

- **Built high-performance financial dashboard** consuming complex CoinGecko REST APIs with integrated client-side retry logic.
- **Implemented deep search filtering** by name/symbol, multi-field sorting layers, limit controls, and rendered real-time 7-day price charts via Chart.js.
- **Optimized layout integrations** using contextual loading/error states, safe financial data formatting, and a responsive dark-themed UI pattern.

Dev Portfolio - Fullstack Portfolio with Strapi & PostgreSQL | *React 19, TypeScript, Strapi 5, PostgreSQL, Cloudinary*
Live: philipsola.vercel.app | GitHub: github.com

- **Architected and optimized full-stack infrastructure** leveraging a React frontend, Strapi headless CMS backend, PostgreSQL, and Cloudinary media management.
- **Built a dynamic content system** utilizing Strapi REST/GraphQL endpoints to dynamically populate project grids, blog sections, and active media assets.
- **Implemented file-based routing layers**, programmatic SEO metadata injection, Framer Motion animations, and custom React Markdown blog parsing.

Dev Taskal - Task Management Dashboard | *React 19, Tailwind CSS 4*
Live: devtaskal.vercel.app | GitHub: github.com

- **Created responsive Kanban dashboard** supporting flexible item stages, priority labeling, strict due dates, and a custom built-in tracking timer component.
- **Focused on clean code guidelines** and custom state hooks to isolate reusable UI component states cleanly using Tailwind CSS 4 features.

TECHNICAL LEADERSHIP & COMMUNITY

Technical Content Creator | *IDTechnol (YouTube Channel)* — Remote
March 2023 – Present

- **Authored comprehensive video courses** covering core web fundamentals (HTML5, CSS3) and content management structures, educating a growing community of developers.
- **Architected open-source code repositories** for each video module, guiding learners on clean code practices, semantic styling, and responsive layout techniques.

TECHNICAL SKILLS

- **Frontend Core:** React.js 19, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS 4, Vite
- **State & Routing:** TanStack Router, TanStack Query (React Query), React Router 7, Context API, Axios
- **Full-Stack & APIs:** REST APIs, GraphQL, Strapi 5 Headless CMS, Node.js, Express.js, MongoDB, PostgreSQL, JWT (httpOnly + Refresh Rotation)
- **Performance & Architecture:** High-performance SPAs, Code Splitting, Lazy Loading, Cursor Pagination, Debouncing, Throttle, AbortController, React.memo, useMemo, useCallback
- **Deployment & DevOps:** Vercel, Render, Cloudinary, Git, GitHub, vercel.json SPA Rewrites, Render Health Cron, CORS, Environment Variable Management

---

EDUCATION & STRENGTHS

- **Higher National Diploma, Computer Science** – Edo State Polytechnic, Usen | 2016 - 2018
- **National Diploma, Computer Science** – Edo State Polytechnic, Usen | 2013 - 2015
- **Core Strengths:** Architecture Optimization, Reusable Component Design, State Synchronization, Performance Auditing, Technical Communication
- **Languages:** English (Professional), Yoruba (Fluent)
